

CE-9-5603-

Adjustable telescopic insulating stick

Application:

- Intended for voltage detection, earthing and short-circuiting operations.
- Adjustable length by clamp system, according to intervention height.
- Possibility of adding an extension (**Z-RAVZC200**) to increase max length up to 7,6 m.

Features:

- Stick made up of 3 cylindrical tubular elements in composite fiberglass / epoxy resin.
- Easy maintenance and replacement of top tube and fittings.
