

# Non contact voltage detector 315 kV to 765 kV

## **Application:**

- Non-contact voltage detector, voltage range from 3 kV to 765 kV.
- Approximate detection distances (varying with the environment): 150 mm mini (11 kV) to 700 mm mini (66 kV)
- Ultra-compact, switchless series to ensure permanent operator safety (indoor and outdoor use).

#### Features:

- Nominal network range: 3 kV 765 kV (8 ranges model proposed).
- 360° light indication.
- Self test function.
- Precise and stable operating threshold.
- Reduced sensitivity to induced voltages and to interference fields.
- Temperature conditions: class N (-25°C to +55°C).
- Power supply: 1 standard 9 V battery 6LR61.
- Network frequencies: 50 to 60 Hz.
- High environmental resitance (impact, vibrations, moisture) due to robust thermoplastic housing.

### **Composition:**

• Packaging: supplied in a carrying bag.

#### **Optional accessories:**

• Recommended insulating sticks: CE-4-21, CE-9, CE-5

Ref	Weight	Length	Voltages for use
		Frequency	Voltage range
CN-7-315-765-K	300	50-60 Hz	315 kV - 765 kV
